

“Our business was built on providing quality housing. That’s why every home we sell includes Fome-Cor sheathing – or we don’t sell the home.”

Fome-Cor® Sheathing Board unfolds accordion-style from continuous sheets, providing almost seamless all-weather protection for walls and roofs. Subroof overlaps the sidewall assuring a tight weather-wrap.

Window and door openings are cut out after Fome-Cor is installed — creating a tight seal right up to the edge of each opening.

Fome-Cor reduces air infiltration as much as 90% compared to homes with no infiltration protection. Cuts fuel bills up to \$10.00 a month. Fome-Cor is also waterproof, reduces condensation problems, deadens sound and provides a substantial backing for roof and sidewall.

No matter how you figure it, Fome-Cor helps increase your sales and profits.

But don't take our word for it — take Bob's, Harland's, Joyce's, John's and Rip's. They do the dealing. They know.

Fome-Cor®
Sheathing Board
